

Lorence Talay

Software Developer | IT Support

Calgary, AB | 587-578-3720 | Talay.lorence123@gmail.com

Portfolio: portfolio-one-kappa-t2a5f71zrz.vercel.app | GitHub: github.com/Lorencet1

SUMMARY

Software Development graduate from SAIT who builds web apps with React and Next.js and backend APIs in Python. Alongside that, I've spent over eight years solving problems for people face to face in busy retail and food service jobs, including leading shifts as a team lead. I'm looking for an IT support or junior developer role where I can bring that same patience and follow-through to technical problems.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, Python

Frameworks and libraries: React, Next.js, React Native, Node.js, Express.js, FastAPI, Tailwind CSS

Tools and version control: Git, GitHub, VS Code, Vercel

IT fundamentals: troubleshooting methodology, DNS and DHCP basics, ipconfig, ping, tracert, nslookup

SOFT SKILLS

- Explaining technical problems in plain language to people who aren't technical
- Staying calm and patient with frustrated customers, even during the busiest rushes
- Leading shifts and training new team members until they're confident on their own
- Dependable and consistent, with Save-On-Foods since 2020
- Picking up new tools and processes quickly, from store systems to new frameworks

PROJECTS

Portfolio Website | Next.js, React, Tailwind CSS, Vercel [View live site](#)

- Designed and built my personal site from scratch in Next.js, deployed on Vercel with automatic updates from GitHub.
- Built two interactive demos visitors can use in the browser: a help desk ticket queue and a workout tracker that totals sets and training volume as you log.

Help Desk Ticketing System | Python, FastAPI, SQLAlchemy, SQLite github.com/Lorencet1

- Building a REST API for IT support teams to create, prioritize, assign, and resolve tickets, with a full status history for every ticket.
- Organized with object-oriented Python so new features can be added without rewriting existing code.

EXPERIENCE

Produce Clerk | **Save-On-Foods** 2020 – Present

- Rotate and restock produce daily, oldest stock first, keeping the department fresh and cutting down on waste.
- Keep an eye on low stock and help plan orders so shelves stay full through busy periods.
- Answer customer questions and solve problems on the spot, often during the busiest hours of the day.

Team Lead | **Tim Hortons** 2018 – 2020

- Ran shifts and kept orders moving during rush periods without letting service slip.
- Trained new team members and explained procedures simply so they could work on their own quickly.
- Handled customer concerns calmly and knew when to escalate to a manager.

EDUCATION

Software Development Diploma | SAIT, Calgary, AB Graduated August 2024
